

# THE BASSANO MAIL

BASSANO, ALBERTA. THURSDAY April 21, 1927

## INDIANS CLIP HORSE HAIR FOR PIN MONEY

**White Men Also Share in the Harvest**  
Bron Dead Range Horses

The poor Red Man is picking up money off the prairie this spring by clipping the hair from the tails and manes of horses that died on the range during the winter. The White Man too, is copying the Indian, and succeeds in the harvest.

From one to a pound and a half of hair is taken from each dead horse, and this brings from 35 to 40 cents a pound.

The past winter enacted a heavy toll on the range horses. It is estimated that over twenty per cent died from want of feed and water.

Unable to withstand the hardships of a long, hard winter, and with a scarcity of fodder, a large number of horses have died on the prairie in the vicinity of Bassano during the past winter. The Indians, who have never done harm to men, have been taking lessons in basket weaving. A large number of traps, jardinières, and baskets were made.

## CLASS IN BASKETRY WAS VERY POPULAR

The basketry class conducted under the auspices of the Women's Institute last week was very popular with the students. They learned how to make lessons in basket weaving. A large number of traps, jardinières, and baskets were made.

day's struggle for food, many of them caught swallows, trying to scavenge a meager living from beneath a market of hawthorn bushes. In snow, the swallows fought a tit-for-tat war of odds. The grass was thin and short. Paving and scraping all day long, the horses were able to uncover barely enough food to keep from starving.

With this unbroken diet, the horses did not escape the rigors of the Fried weather. Lying down in the cold snow at night, tired and weak after

## The Romantic Story of the Haggis

**Some Stirring History of the Early Scots and the Evolution of the Haggis—How the Haggis Beat the English**

Haggis is not, properly speaking, gathering that if the awe-inspiring a pudding. There is a somewhat shirk of the dying haggis could only be preserved and there are means which it can be done.

means of haggis, which seems that it is something quite different from either. A racy story of what it actually is, by Robert Watson, is given in the Beaver, the house organ of the Hudson's Bay Co. as below.

The haggis, let it be known, is a well-known and frequent guest in the platters of the Highland ale-houses and it is a great fighter. But its flesh is so great a delicacy that it is much sought after, and desperate chances have been taken in pursuit of it, as well as trying to get away with it. The haggis, however, is a bold Highlander risen from his bed and goes out in the dead of night, clad only in kilt and shirt, bare of foot and armed with a short dirk, thus to trample the Kingly haggis to his native lair in the highland hills. For he, too, is a man, an intrepid hunter, who quenches on his stomach behind a haggis-hole, awaiting the first blink of dawn, when the brute, with the stumper of sleep still upon it, ventures out in search ofasty meaty puddings.

The haggis can be killed in one way only. Its vulnerable point is the tender. When it has been hit in the shoulder blades; and it is at that point that the crafty hunter strikes. If he succeeds, the haggis is hit. If he does not, it is not.

In addition to the haggis being a great table delicacy, there is a bounty on haggis tails of two-pence-halfpenny that is why the average highland Scot has a haggis.

Fortunately for most people, they have been providentially preserved from hearing the awful death shriek of a haggis. Those who have been unfortunate enough to hear it, know that it is like nothing on earth. Stay! That is not quite accurate—it is like nothing on earth, but that is not. That terrible, agonizing yell, once heard can never be eradicated from the human consciousness.

Scottish history, and also Sir Walter Scott's "Tales of a Grandfather," inform all who care to read that poor, persecuted, and half-naked, sober, harmless, animal-worshiping, ne'er-hating Scots in bygone days were much harassed by their thieving, rapacious head-chopping neighbors to the south of them, the English; and for years they strove to clear their borders of these depredators, but without success. But one day, in dire straits, it occurred to one of the noble Scottish leaders, Sir Iain Gleng Cambuch Macalister, familiarly known as Red Ian of the Highland

## Rosemary News

**ROSEMARY.** April 21.—Several head of cattle and sheep were lost in this district during the winter, which was unusually severe. The stockmen said that that was the heaviest storm this winter on their stock.

Mr. and Mrs. Park are rejoicing over the birth of a baby girl in the Bassano Hospital early Saturday morning.

Effie was a Calgary visitor over the weekend.

Mr. and Mrs. Copeland returned home from their Easter holidays on Tuesday.

Louie Conn was a Calgary visitor over the weekend.

## HUSSAR MAN DIES FROM AN ACCIDENTAL SHOT

**Hugh Stanisleigh Dies in His Calgary Home from Shot of Rifle He Was Handling**

Hugh Stanisleigh, of 3408 Fourth street west, Calgary, was accidentally shot about 1 p.m. Thursday afternoon and died shortly afterward. He was engaged in cleaning a .22 rifle at the time.

Decedent was 51 years of age, a native of Aberdeen, Scotland, and was until a month before his death, manager of the Hawk Eye ranch at Bassano. He left the ranch to take up residence at the address where he met his death.

About 1 p.m., after partaking of his lunch, he went to the basement for the purpose of cleaning his rifles and had the stocks of two disconnected and cleaned and preparatory to having them refinished, as he intended to do.

It had not been long in the basement when his wife, who was working upstairs, heard the report of a gun. She immediately hastened to the basement, where she found her husband lying, writhing in pain on the floor near the bottom of the basement stairs, with his hands pressed to his breast.

On being asked what happened, he said: "Oh, the thing went off."

A 22 high power rifle factured in a canvas gun case, with the end blown off, was lying on the floor. Decedent, who was unable to move, was discovered. Living for months close to starvation, they gorged themselves on the long frozen tough grass that grows in certain low lying places on the range. They received indigestion and died.

The body of Hugh during the past winter was very heavy, ran of the heaviest in the history of the district.

His struggle for food, many of them contracted influenza and died. Others that survived the long struggle succumbed to pneumonia and other complications after a period of convalescence.

He was able to work for a few days.

He was admitted to the Western Hospital where he died shortly after having been admitted. The body was removed to Shaver's undertakers room where an autopsy was held.

Cornier C. S. Mahood attended the autopsy and has not yet decided whether the gun was discharged or not. Wives said she was trying to find some means of doing so, but all was unavailable until after a year of research; whisky that (wonderful preservative) was discovered — a whole fake of it — in a quiet, unfrequented corner of the basement.

The late Mr. Stanisleigh was very well known in Bassano both in social and fraternal circles, having been in existence and, although the draw of recent years have made great inroads on roads, it is still the centre of a busy and thriving city of over a million inhabitants.

The experiment was tried before the then aged and experienced Mr. J. G. Raymond Gathering, who was ending his life peacefully by the lake shore taking the waters. (Haggis or Haggai) were caught alive, stabbed between the shoulder blades over a vat of this delicious lake fluid, then pinned to a board and drawn across the floor, had, ever drawing awestruck. Thus, to the everlasting glory of Scotland, was the dying shriek of the haggis preserved.

Next a hundred haggis skins were stretched and dried, holes were pierced in these at intervals, and through these rents, the whisky containing the preserved yolk of a hundred daggis was poured. A hundred volunteers were called for the hazard our undertaking, and a million volunteered. A selection was made, and he who was chosen to be the first to drink the potion was the one at Raymond Gathering.

He was a man among men, and he will be greatly missed in the many places where he was a welcome visitor.

The deepest sorrow is felt for Mrs. Stanisleigh, and the respect in which Mr. Stanisleigh was held was shown when his body was laid to rest, in the fact that one hundred hundred ears followed the hearse, the floral tributes filled two big cars.

Husar Lodge A. F. & A. M. were represented by every member living in the district, and whose wives accompanied them to Calgary to pay their farewell tribute to one who was a man and whose place in life will be hard to fill.

These were the first known bags.

The English broke and fled, leaving half their forces dead on the field.

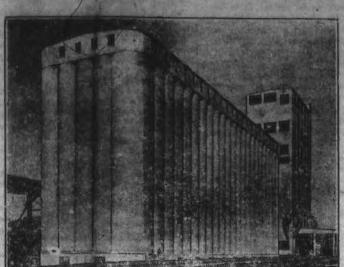

One morning, however, but that his troops had not returned. Red Ian, in deep anxiety, put a mortice in his eye and a pair of trousers on his legs and, thus disguised as an Englishman, made for the scene of carnage. To his amazement he found the English to be round 1000 "hundred pipers and a' t' ring" in various picturesquely attitudes among their dead foes; celebrating their victory by singing "Auld Lang Syne" in a hundred different keys. Not a liquid yell could the thirsty Red Ian hear in any language, so well had his brave Highlanders done their work.

This is the story of how the haggis, the hated Sassenach,

celebrated their victory by singing "Auld Lang Syne" in a hundred different keys. Not a liquid yell could the thirsty Red Ian hear in any language, so well had his brave Highlanders done their work.

The arrival of real spring received another set-back last Friday and again on Monday when storm clouds blew down from the north bringing strong winds and snow. The temperature dropped so near zero mark and with everything frozen up, and the wind blowing and snow drifting, it looked as though spring was far

## Wheat Pool Elevator at Prince Rupert

## OPERATIONS OF TERMINAL AT PORT OF PRINCE RUPERT

The Alberta Wheat Pool has loaded two ships with wheat from the 1926 crop at Prince Rupert and expects to bring the total up to twenty-four before the crop movement is ended this spring.

The Alberta Pool terminal at Prince Rupert has handled 5,188,000 bushels and the total will be 6,000,000 bushels within a few weeks. This is a larger total than was anticipated last fall.

The Prince Rupert house was built and is owned by the Canadian Government, and has a capacity of 1,250,000 bushels and is probably the fastest

handling terminal on the coast.

Through the Pool's extensive operation, the ocean freight differential has disappeared and grain is shipped to Europe from Prince Rupert at the same cost as from Vancouver.

Of the 200 ships already loaded or committed, six carried grain to the Orient and eighteen to Europe.

Previous to the Pool loading the Rupert terminal no wheat had been shipped from that port.

## ALBERTA SUGAR BEET INDUSTRY GROWING FAST

Raymond Factory Shows Increase Over Last Year

A thriving young industry of today that will grow to an industry of tremendous importance within a few years, is the prediction made for the sugar beet industry of southern Alberta. The plant at Raymond, recently opened, has a capacity of 100,000 tons and a half dollar, has now been operating for two years. The owners of this plant claim their product to be equal in quality and purity to any sort of cane sugar. They estimate that if every person in Alberta used beet sugar it would require five tons of sugar to supply the needs of the province.

The Canadian Sugar Factories Ltd., owners of the Raymond plant, are displaying an attractive exhibit at the Southern Alberta Products exhibition in Calgary.

Significant about the industry is that all the raw material used in the production are grown in Alberta, and the return from the business

a brand new Ford touring car is the splendid prize which will be given by the swimming pool committee of the sugar beet industry of southern Alberta.

The plant at Raymond, representing a capital investment of \$100,000 and a half dollar, has now been operating for two years. The owners of this plant claim their product to be equal in quality and purity to any sort of cane sugar. They estimate that if every person in Alberta used beet sugar it would require five tons of sugar to supply the needs of the province.

The Canadian Sugar Factories Ltd., owners of the Raymond plant, are displaying an attractive exhibit at the Southern Alberta Products exhibition in Calgary.

The swimming pool committee, consisting of Geo. Travis, Wm. Buchanan, and M. D. Macdonald, report that their plans are shaping up nicely and good returns are being made on the sale of tickets.

## NEWS OF INTEREST FROM GEM COLONY

**Stormy Weather Causes Postponement of U. F. A. Meeting and Community Sale**

GEM, April 20th.—Eugene Jones left the Colony on Friday morning with his parents. He will spend the Easter holidays at home, returning on the 26th to resume his studies in the Gem School.

Mr. and Mrs. Ed. Jahraas are expecting a number of relatives from Pisgah, Sask. and other parts of Canada.

Jacob Tets, one of our sheep shearers, who went to the sheep camp several days ago, was caught there during the terrible snow days that have just passed. He returned home on Monday.

Lots of rain on Good Friday evening in the district, and lots of snow, too, on Saturday.

Our local postmaster must postpone a big stock of British goods to face the terrible storm on Monday. He left promptly at nine, and had the company of S. Hendricks to Bassano. He made the return trip to the Gem on Saturday morning.

Of the 200 ships already loaded or committed, six carried grain to the Orient and eighteen to Europe.

Previous to the Pool loading the Rupert terminal no wheat had been shipped from that port.

They remained to Wintering Hills on Good Friday.

For the second Saturday in succession both the U. F. A. meeting and the community sale had to be postponed owing to the terrible storm.

Weather permitting, the sale will take place on Saturday afternoon. The U. F. A. meeting will be held in the schoolroom on Sunday evening.

B. Gray is auctioneer at the sale, and M. Atkins clerk.

C. Vlet, who recently took a load of horses to B. C., is expected to return during the next few days.

E. Small returned early in the week from Drumheller.

Mrs. G. Keeling spent Easter Sunday with her parents on the home farm.

Results of Gem school Easter examinations.

Grade VIII

John Douglas 75, Edna Robson 72, Luella Wathern 71, Bill George 54, Carl Schnitzer 48, Dale Langlin 42, John Laughlin 42.

High School Standing

Luelle Pollock 81, Don Forney 75, Wm. Pollock 75, Wm. Royer 71, Leon Miller 69, Eddie Jones 68, Margaret Douglas 68, Idia Reeson 66, Eugene Schnitzer 66, Dale Langlin 62, Walter Pollock 58, Maurice Scheibner 54, Rahama Parrot 53, James George 52.

## Duchess News

**DUCHESS.** April 20.—Email Clout and wife, while on a visit to the Gem, were riding in a car when their horses kicked him and broke his leg. Long Landrum took him to Bassano where Dr. Scott set the limb and he returned home on Monday.

Mrs. Laura Hole who spent the Easter holidays with her son, got married Saturday evening.

Red Crabbe returned Friday evening from Calgary and Harris where he has been visiting friends.

Mrs. Grace Stafford is ill and not able to work in the store.

W. E. Smith, who has been here from Calgary, visiting at the home of Mr. and Mrs. Purcell.

A party was held on Saturday night at the home of Mr. and Mrs. C. Hole for their daughter, Laura.

On Wednesday there was a party at the home of Mr. and Mrs. C. Weston.

The Duchess Ladies Aid and W. J. tendered a banquet to the Duchess players and musicians on Wednesday night, showing their appreciation in putting on the play "Deacon Dubs" for the benefit of these two organizations.

The Ladies Aid are giving a bean supper on Friday the 22nd, followed by a short program and a sale of articles left over from the bazaar.

Now packed in Aluminum.

# RED ROSE TEA "is good tea"

Your grocer knows when you order  
**RED ROSE ORANGE PEKOE** you  
are a judge of fine tea.

## Where Canada Leads the World

Canada exports more wheat than any other country in the world. It produces most of the world's supply of nickel. Within the last two years it has passed the United States in the production of newspaper and is now the greatest exporter in the world. Imported facts, such as these, are becoming common knowledge among business men, but it is not yet fully appreciated that the Canadian articles must be the dominant factor in the position of first importance among the trading nations of the world.

The jubilee year of Confederation is a good time to take stock of our national achievements, not that we should become boastful as a people, but as an encouragement and an incentive to still greater efforts. It has been shown that the Canadian people are inferior to no other in the world in their ability to build up our country and its possibilities, trust to them of those that, as a consequence, we are apt to entertain doubts and be fearful of the future instead of displaying confidence and courage.

It is a good thing, therefore, to see sometimes get a glimmer of ourselves as others see us. The National Federation of News Editors, in a recent statement, says Canada has led all nations in increase of external trade since 1913, with an increase of 8% per cent, as compared with Australia's 15 per cent, and 21 per cent for the United States.

The League of Nations Bureau recently issued a report showing that Canada's exports worth \$1,000,000 in 1906 had risen to \$2,406 in 1926, a record monthly total for any other nation.

The National Bureau of Research of the United States recently published the results of 17 years' trading showing that Canada had enjoyed more prosperity than any other nation.

In the same statement, the Western Provinces of Canada have been transformed from being a vast area, with a sparse population and a meager production, into a community of over two million people and with an agricultural production of such magnitude as to command the attention of the whole world, and constituting a factor to be reckoned with in all the world markets.

The development of the Canadian market, the recognition of its value, was not recognized by Western people in not fully appreciating the rapid growth and development which has taken place in the older provinces in the east. Manufacturing production in Canada has grown from 211 millions of dollars in 1901 to 1,211 millions in 1925, and in export of manufactured products expanded in the same time by 2,729 per cent. Today Canada exports some millions of dollars worth of manufactured goods more than she imports, a complete reversal of the situation as regards as five years ago.

Canadian manufacturers are beginning to profit from the lessons of the past. They realize that we have become too dependent on the United States for our market, that they are passing, and that the time has come to develop a lower rate of exchange with America. They know they must rely on something more than a protective tariff to ensure success and make profits. As a result they have scrapped much obsolete machinery, have adopted improved manufacturing methods, have not only enlarged their markets, but through the giving of real service, but they have aggressively entered new markets and have built up a world-wide export trade. All these signs are no longer in the clouds.

They are beginning to appreciate the wisdom and strength of a Canadian policy of negotiating trade treaties with other countries, and to recognize and accept the fact that international trade cannot be all one-sided. In the west, Canada has largely succeeded in developing markets for its own products, but in those markets, Canada's manufacturers and exporters are also to an increasing extent, investing in the development of the natural resources of the Dominion instead of relying on the importation of raw and semi-manufactured materials which the Dominion itself can supply.

It is because of a growing recognition and application of these truths that Canada is today leading the world in the growth and development of external trade.

## Empire Mining Congress

**Delegates From All Parts of the World to Meet in Montreal**

Nearly seven hundred delegates have registered at the Canadian quarters for the second Triennial Empire Mining Congress which is to be held in Canada, August 22 to September 25 next. Great Britain is sending a delegation of both scientific and United States about 100, while the Federated Malay States, Palestine, U.S.A., most of the different countries that make up the Continent of Africa, Australia, New Zealand, Tasmania, and all the principal European countries are also to an increasing extent, investing in the development of the natural resources of the Dominion instead of relying on the importation of raw and semi-manufactured materials which the Dominion itself can supply.

It is because of a growing recognition and application of these truths that Canada is today leading the world in the growth and development of external trade.

## Will Design Memorial

**Queen Alexandra Monument is to be Work of British Sculptor**

The memorial to Queen Alexandra, designed by Alfred Gilbert, British sculptor, will typify faith, hope and charity.

The Queen Alexandra monument will occupy a position close to the Marquisas House, from where for many years Queen Alexandra conducted a gracious leadership of British society.

It is understood that the many requests for an official biography of the late Queen Mother have not been granted, but it is hardly to be denied that late May received only scant attention in the authorized biographical work of the late King Edward.

No one need ensure the agony of death with Holloway's Corn Remover at hand to remove them.

**Policeman:** "We are your stand-in for the Queen."

**Queen:** "Calm."

**Policeman:** "Well, just move on; everybody's bound to stand in once; 'ow would the rest get past?"

The government's grain elevator, which is under lease to the Wheat Pool, and the ultimate in Prairie transport, are providing helpful to agricultural interests in the West. The grain elevators, Columbia, Alberta, are being shipped through the clearing stage in began operating last year, and went to Europe.

**Grain Shipped Through Prairie Ports**

## Pioneer Industry Flourishes in Quebec

Upper Left: Men at work in Quebec; middle left: men at work in Quebec. Upper Right: Eric Letham, entering a taste of maple syrup from the tree sap. Lower Left: Gathering sap from the tree sap. Lower Right: Tapping the tree in mid-winter.

One of the sure signs of spring about the Canadian Pacific Express yards in Montreal is the appearance of large quantities of maple syrup being tapped by the hands for local distribution and outside shipment. Some of the shipments are destined to go to the United States to supply the American residents of Quebec who become homesick for this Canadian delicacy and send an order through their friends in Canada.

The maple sugar industry is one that has been carried on in Quebec for many years. The syrup is very good and has a well deserved reputation for purity. Adulterating the syrup with cane sugar is a practice that is strictly guarded against.

Old-time maple sugar bushes are still held all over the province with the melting of the snow and the first appearance of the sap in the spring, the last end of March and the first two weeks of April, while the product is one of the most useful appetizers to the people of the country. It is sold mostly on the money at a time when that commodity is scarce.

A good example of a typical French-Canadian maple sugar house is the one owned by Mr. and Mrs. G. L. Desjardins at Knowlton, Quebec. In this case the trees, which number 1,400, are tapped in mid-winter by men who travel from house to house to do the community work. The trees are tapped at this snow line, which is about three or four feet from the ground. Large trees take two cans and small ones one spot of production, a lifetime habit is formed that one can, while the trees are never tapped in the same place again.

The maple trees attain a circumference in some cases of ten to twelve feet. The method when the sap is gathered is to bring it to a shanty in the woods where it is boiled down until the water evaporates and pure maple syrup is left.

The maple woods in the Eastern Townships section of the province are a natural sight at maple sugaring time. Citizens of Montreal and other parts of the country will be brought to profitable exploitation and millions of dollars will accrue to the farmer. Once again the old adage holds true that "a little goes a long way."

The industry is still in its infant stage. When the Canadian government finally makes it a penal offence all over the Dominion to adulterate maple syrup with cane sugar, the market demand will be brought into profitable exploitation and millions of dollars will accrue to the farmer. Once again the old adage holds true that "a little goes a long way."

Stephen and Ralph Johnson who are studying in Calgary come home for the holidays.

John and Stanley Howard who are attending "Teek" in Calgary motored down for a few days stay at home.

## It Has {Beauty Power Smoothness Economy Comfort} Everything

NEW LOWER PRICES  
The new Fisher-built bodies, finished in the latest colors, are now available. The massive full-crown fenders, the smart new headlight, the new front end, the modern radiator—the host of mechanical refinements—make the new Fisher-built Chevrolet unique—their powerful, smooth and quiet engines, the light weight, the roomy interiors, the sturdy, shockless frames of construction, all contribute to the chief advantages of ownership. The new Fisher-built Chevrolet is the most beautiful Chevrolet experience.

All that you want in a motorcar is now available in the NEW LOWER PRICES. The lowest for which Chevrolet can be had is \$814.88. Other car or using the price of a new Chevrolet, the lowest for which Chevrolet can be had is \$814.88. The new Fisher-built Chevrolet is the outstanding automobile achievement of the year.

EUROPEAN WIRELESS STATIONS ARE TESTING Big wireless stations in Europe have changed in size to eliminate any interference between high-powered transmitters. While most radio fans were aware of the great English, German, and French broadcasting stations have been experimenting with them. About thirty stations are now broadcasting practically every day on wave lengths varying from 1,000 to 2,000 meters, and two extreme distances a difference of one in 187 kilometers, and hence arises the difficulty of filling in so many stations without mutual interference.

## Local News

Miss Irene Magee of Calgary, is the guest of James Johnston.

Jimmy Donaldson of Brooks, was home for the holidays.

Miss Myrtle Ballou spent the Easter holidays with friends in Brooks.

Mr. and Mrs. McLawrie were in Calgary for the holidays.

Customer: "Here's something in my chicken salad, water, that looks a good deal like feathers."

Walter: "Dat can't be possible, sah."

Customer: "Why not?"

Walter: "Kase calves don' hab no feathers."

They were discussing the North American Indian in a rural school when the teacher asked if anyone could tell what the leaders were called.

"Chiefs," announced a bright little girl at the end of the class.

"That's right," answered the teacher, "and now can anyone tell me what the women are called?"

There was a moment of silence, then a small boy's hand was seen waving aloft, eager to reply.

"Well, Johnny?" asked the teacher.

"Mischief," he proudly announced.

Teacher: "What does unaware mean?"

Susie: "It's the last thing you take off at night."

"Mab brediton," shouted Parson Pollock, "yo' want' be ready to bring when yo' heabs Globul blad dat blad."

"Fo' goodness sake!" murmured Brother Simpson, "am he-a-comin' in er autymobeel?"

## Another Success

## Public Preference Endorses the New and Finer Pontiac

ALREADY you see on the highways the evidence of the popular acclaim with which the New and Finer Pontiac Six is being received. Already enthusiastic owners by the thousands are wholeheartedly endorsing this unusual model by praising its arresting beauty, its long, low lines, its fitness, its countless new refinements, its up-to-the-minute completeness. Even their most optimistic expectations have been more than realized in the New and Finer Pontiac Six.

If you have not seen and inspected the New and Finer Pontiac Six at close range—if you have not investigated the new, lower prices which are making Pontiac Six the outstanding car of its field—you owe it to yourself to do so without delay. For, in the New and Finer Pontiac Six General Motors presents its latest achievement in answer to the need, for a truly fine, low-priced six-cylinder car. You are invited to come in and see it for yourself.

CHAPTER XXXII.—Continued

"Don't spend your time with 'what-is-it'?" she challenged him. "What is it?"

He ignored her challenge for a moment while he lighted a cigarette, Brad, offering her his platinum case. When he had done so, he held it out again, fastened it over the firelight and dropped the burnt match into it. For another moment he puffed calmly.

Then turned to face the girl, who leaned back against the table in the corner.

"Would you mind," he said, softly, deliberately, "telling me what's your general impression of me? Not an analysis of my character, please, but an expression of the quality of you, regard for you."

She replied without hesitation:

"I have always distrusted you, but I have never been convinced that I was justified. If I hadn't feared you, I'd have liked you." As it is I am afraid I do.

"I don't know if you know, but I am dismally—dismayed with you and with Yvonne, who loves her, that the answer you want!"

"Not exactly, but it will serve. Suppose I should use you to become my wife?"

"You used to tell me that you might do that, some day. I've always had an answer ready. I'd never marry you because I could never love you. It's the same with Yvonne. I'd never marry her, no! She's the best girl in the country, you belong to Yvonne whom you allowed to love you before you decided to laugh at her for her pretension that she would be worthy of you."

He drew in his cigarette flame, and then drew in its smoke.

"That establishes our position toward each other," he observed, and was silent for another interval. "But the question is, is that you are going to marry me or the tess, because you will have to."

She averted her slender white hand went to her throat again. She knew he was not talking idly. She had good reason to fear him.

With Keweenaw, now, she knew, she was at the beginning of another, and in some unsuspected way, a more desperate life. She waited for him to go on.

He threw the cigarette into the fireplace, and faced her across the table.

"He pleased to understand the import of what I am about to say," he breathed.

"You have wondered where

your money came from; you have

been

to see

the

Banker Out—"

Dr. Pierce's Favorite Prescription and my greatest beauty by the use of it. My hair grows 11 inches a month, and I hope it will hold on me longer than any other poor woman in the world."

"You'll soon feel better if you obtain this Prescription at your nearest drug store, and if you can't get it, go to Dr. Pierce's Laboratory in Bridgeport, Conn., for that peg of tobacco."

W. N. U. 1677

Suddenly the little girl stiffened, her eyes darting from the floor back into the quivering lips. She swung around slowly and walked firmly back into the room until she stood so close to Brandon that her breath was hot upon his neck.

"I want to keep my money. Please," she said, her eyes quivering but soft and hopefully pleading: "I couldn't do without it now. But I am very much in love with someone else very much in love with someone else. You know, you would understand. I don't understand myself. Nor does the man, I mean, that I am in love with. You'll be kind to me, won't you? Please tell me what I should do with it now. What's the trouble?"

"Anything I say?"

Before his sudden thoughts back at her those pleading words, she shrank as if he had struck her, but then she had a look of such tenderness in her eyes that you had to understand that neither you nor he understood.

"I am the one to whom you have been making in every whim, in every choice of the paths you have elected to follow!"

"Your accounting has been fully made up. I'm told up—by me. I give you now, the results. I demand that you marry me."

"I do not say that you are right, for I do not."

"I am asking you, even that I request you, for I despise you, as you have professed to despise me, I shoulder before all that you stand for—the abortive pretences of you, the shame of you, the deceit and cheapness of you."

"The morals of today, you know, and the conventions, are not what they were in the yesterday. You are not the girl of yesterday, nor your love is the love of yesterday. You have played the game of love, but will not shrink before the game you've essentially ruined!"

"I am asking you to be my wife—only. To give me your love only. You will give your love where you want it to go. I am ready to take what you now have in exchange for the love that you have given me."

"I am asking you to be my wife—only. To give me your love only. You will give your love where you want it to go. I am ready to take what you now have in exchange for the love that you have given me."

(To Be Continued.)

### Remarkable Vision

Australian Natives See Stars in the Daytime

An Australian aborigine, prospective now in this country, has some wonderful tales to tell of the acuteness of the senses of the native races. It was during the war that an English cavalry lancer could detect a spearman who had played the game of hide-and-seek with him to be lost—it would be a lamentable situation.

"Along the same line, twenty-one million days of labor are lost annually in Canada through illness. One-half—forty per cent—is preventable. These losses are equivalent to the cost of the Panama Canal."

"Dora" is up make for the devastating work of revivable disease, that enemy which is attacking the health of the people in the field of production.

"The morals of today, you know, and the conventions, are not what they were in the yesterday. You are not the girl of yesterday, nor your love is the love of yesterday. You have played the game of love, but will not shrink before the game you've essentially ruined!"

(To Be Continued.)

The Famous "Waterloo Ball"

Function Took Place Two Nights Previous to Battle

H. Oldfield Box writes in London's Weekly: "Lady Altagracia Fane's book of reminiscences, 'Chit Chat,' makes a statement that there was no Waterloo ball.

"An American lady, Mrs. George Moore, has written a history of the battle, and she claims that there was no Waterloo ball in 1815."

"A Frenchman, M. de la Motte, has written a history of the battle, and he claims that there was no Waterloo ball in 1815."

"A German, Dr. W. Beach, has written a history of the battle, and he claims that there was no Waterloo ball in 1815."

"A Frenchman, Dr. W. Beach, has written a history of the battle, and he claims that there was no Waterloo ball in 1815."

## Local News

Mrs E. C. O'Neill was a week-end visitor to Bassano.

Mrs Christina Martock, of Calgary is the guest of Miss Ethel Holmes.

Mrs Roy Martin of Rosemary is improving after her recent operation.

A daughter was born to Mr. and Mrs. Wm. Parks of Rosemary, on Fri. April 15th at the Bassano Hospital.

Born to Mr. and Mrs. Lorne Slattery of Hussar, a daughter, at the Bassano Hospital.

Mrs. Beagle of Arrowwood has returned home after her recent operation in the local hospital.

Monty Dodge of Bassano thought the local horse show was looking pretty bushy as the result of being crushed between two grain tanks. He is progressing very well.

AN ARTICLE OF SPECIAL  
INTEREST TO CITIZENS OF  
BASSANO AND DISTRICT  
(Contributed)

The public utilities of an urban point such as Bassano, consisting of waterworks, sewerage system and drainage, gas, electric power, telephone office, etc. (all of which means much in the way of convenience, sanitation and accommodation) should be given consideration by way of co-operation in local trading.

Trade and business instances cited is impossible for local merchants to handle world-wide assortment of goods and one cannot be censured for trading out-of-town, for articles not available in the local market, yet there are many instances where the out-of-town trading takes place and the buyer is otherwise than satisfied. It is often the case that inferior or unsatisfactory merchandise—and which is due to dependence on printed descriptions and lack of personal material inspection.

It has been proven in many instances that the best method of protection of quality and value being made, that out-of-town purchases presumed to be economical were otherwise—more expensive.

If there are instances wherein a purchaser is in the market for a large order of merchandise, it will not be unusual for him to buy such goods by quotation from local merchants as reasonable as the prices quoted by out-of-town concerns and such being the case, the buyer is to an advantage by way of personal material inspection—to say nothing of personal service, a matter of indifference by way of support to local concerns and which in all means standing by and keeping up community organization which includes public utilities, and the usual necessary institutions required to all citizens whether rural or town dwellers.

To put this idea in more plain language—if local trading is not practised, urban centres disintegrate and without urban centres the main thread of our social, commercial and national fabric is gone. If such conditions were to exist—as well as a national disintegration, those left in the country would be left with a disgruntled and inferior people.

MORAL.—Trade at home, at least give the local dealer a chance to bid in competition with the out-of-town dealer, and retain our place in the national organization of social, commercial and educational and advancement.

To retain such standing makes life worth living while here as well as handing down an honor bound heritage to posterity.
